

# TANISHK NAVLAKHE

Indore, India | +91 9175197337 | tanishk.23bce10934@vitbhopal.ac.in

## PROFILE SUMMARY

Adaptable Computer Science undergraduate with a strong interest in Business Analysis, backed by hands-on exposure to requirements gathering, structured documentation, data interpretation, and stakeholder-style coordination through certifications and training. Comfortable bridging business and technical needs — able to translate requirements into clear specs (as practiced through IEEE-format project documentation) while also holding technical grounding in databases, SDLC, and Generative AI tools. Strong communicator, quick learner, and open to Business Analyst and AI Developer roles.

## EDUCATION

|-----------------------------------------------------------------------------------------------|-------------|
| <b>B.Tech, Computer Science &amp; Engineering (CGPA: 7.5)</b><br><i>VIT Bhopal University</i> | 2023 – 2027 |
| <b>Higher Secondary (12th), Science</b><br><i>Rankers International School, Indore, M.P.</i>  | 71%         |

## TRAINING PROGRAM

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| <b>Advanced Software Engineering &amp; Development — Training Program</b><br><i>Structured training program with daily classes (Mon–Fri, 1.5 hrs/session) over ~1.5 months</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Jun 2026 – Aug 2026 |
| <ul style="list-style-type: none"><li>Gathered and documented project requirements for a Library Management System, translating stakeholder needs into structured, IEEE-format technical specifications and reports</li><li>Applied SDLC stages end-to-end — requirements, database design, development, and testing — for a full-stack Library Management System (Node.js/Express, SQLite)</li><li>Conducted usability testing and consolidated user feedback to refine workflows, improving overall user experience</li><li>Practiced rapid, accurate recall of OOP, SDLC, database, and cloud fundamentals during a live technical viva under time pressure</li></ul> |                     |

## CERTIFICATIONS & TRAINING

|                                                                                |                                |
|--------------------------------------------------------------------------------|--------------------------------|
| <b>NASSCOM FutureSkills PRIME — AWS Data Analytics</b>                         | Started Aug 2026 (In Progress) |
| <b>Oracle Cloud Infrastructure 2025 Data Science Professional Certificate</b>  | Aug 2025 (valid till Aug 2027) |
| <b>Oracle Cloud Infrastructure 2025 Generative AI Professional Certificate</b> | Jul 2025                       |
| <b>Gen AI Using IBM WatsonX Certificate</b>                                    | May – Jun 2025                 |
| <b>IT Tech Support Professional Certificate</b>                                | Jan 2026                       |
| <b>The Bits and Bytes of Computer Networking</b>                               | Oct – Nov 2025                 |

## SKILLS

**Business & Requirements Analysis:** Requirements Gathering, IEEE-Format Technical Documentation, Usability Testing, Data Interpretation, Stakeholder Coordination, SDLC

**Management & Coordination:** Project Management, Team Management, Conflict Management, Prioritization, Time Management, Coordination

**Data & Analytical:** Data Entry, Data Cleaning, Data Preparation, Data Extraction, SQL, Database Management (DBMS)

**Design & AI Tools:** UI & UX Design, Generative AI Tools (ChatGPT, Claude, Gemini), AI Image Generation

**Tools & Software:** MS-Word, MS-Excel, MS-PowerPoint, Canva, ChatGPT, Claude

**Communication & Interpersonal:** Effective Communication, English Proficiency (Written), Interpersonal Skills, Adaptability, Problem Solving

## EXTRACURRICULAR ACTIVITIES & INTERESTS

**Backstage Coordinator**

- Managed live event flow backstage — cued the next participating team just before the current performance ended, and kept the next and next-to-next teams briefed and ready, ensuring smooth transitions with no dead time on stage

**Interests:** Music, Webtoons, Exploring new topics and hobbies
